organic cotton

Organic cotton does not use synthetic chemical pesticides or genetically modified plants. This reduces the impact on soil, water and air.

Approx. **40 %**
Recycled polyester

Most of our textiles are made from polyester as it's ideal for sporting activities thanks to its functional properties. In order to make textile production even more sustainable, we have been increasingly using recycled polyester since 2020. In addition to new teamlines, popular articles such as the jersey Team or the shorts Manchester 2.0 are now made from recycled polyester.

WE WANT TO CLOSE THE CYCLE

In the last few years, we have already intensively worked on recycled polyester. In 2022, we launched a recycling project to collect worn textiles in Europe and return them to the textile cycle. Together with partners and clubs, we collected discarded sportswear for the first time. A thermomechanical process was applied to create polyester granulate, which was used to produce new yarn and consequently a new jersey in 2023.

Now we want to improve this cycle and are testing a new recycling process. With the support of our retailers and partner clubs, we are once again collecting textiles that will be chemically recycled. The result will be the jersey LOOP, which combines important product features with a transparent recycling process. We are determined to contribute to creating sustainable solutions. True to the motto:

Our Team for a better World.
