# DESIGN PRODUCTS SUSTAINABLE

More than  
**82 %**  
organic cotton

Organic cotton does not use synthetic chemical pesticides or genetically modified plants. This reduces the impact on soil, water and air.

Approx. **40 %**  
Recycled polyester

Most of our textiles are made from polyester as it's ideal for sporting activities thanks to its functional properties. In order to make textile production even more sustainable, we have been increasingly using recycled polyester since 2020. In addition to new teamlines, popular articles such as the jersey Team or the shorts Manchester 2.0 are now made from recycled polyester.

## WE WANT TO CLOSE THE CYCLE

In the last few years, we have already intensively worked on recycled polyester. In 2022, we launched a recycling project to collect worn textiles in Europe and return them to the textile cycle. Together with partners and clubs, we collected discarded sportswear for the first time. A thermomechanical process was applied to create polyester granulate, which was used to produce new yarn and consequently a new jersey in 2023.

We now want to improve this cycle and are therefore testing a new recycling process. With the support of our retailers and partner clubs, we are once again collecting textiles that will be chemically recycled. The result is going to be the jersey LOOP, which combines important product features with a transparent recycling process. We are determined to contribute to creating sustainable solutions. True to the motto: **Our Team for a better World.**

# BALLS

## CERTIFICATES

The training ball WORLD (p. 230) is produced under FAIRTRADE conditions. Here, additional focus is placed on the payment of a bonus to the producer organizations. The payment of a bonus enables the employees to invest in joint projects that improve the living and working conditions of local people.

The “FIFA Quality Pro” certificate promises maximum performance, accuracy and safety. This quality seal guarantees optimum performance at the highest level.

Articles certified with the “FIFA Basic” certificate fulfill the fundamental criteria of performance, precision, safety and durability.

## SURFACE/GRIP

The high quality, structured PU material of the ball offers optimum grip and leads to precise flight characteristics. In addition, the profiled surface improves aerodynamics and gives the ball a stable trajectory.

## SEAMS

**Hand-stitched balls:** The precise seams lead to a perfect form stability and maintain optimal ball pressure. The high-quality workmanship gives the ball a long life span and makes it particularly robust.

**Machine-stitched balls:** The increased number of stitching points ensures a particularly strong connection between the panels, which makes the ball extremely hard-wearing. The special construction also gives it the high-quality appearance of a hand-stitched ball.

**Bonding technology:** The seamless workmanship makes the ball particularly round and enables higher speed in games. The special glue reduces the water absorption, which significantly increases the life span and keeps the ball dimensionally stable even in wet conditions.

**Hybrid balls:** By combining stitching and gluing, hybrid balls combine the advantages of both technologies, giving them exceptional durability, stability and optimum playability.

## LAYERS

The individual combination of various layers of foam lead to a soft, precise ball feeling and at the same time guarantees constant ball properties, even at low temperatures.

## BLADDER

**Butyl bladder:** The high density of the butyl bladder minimizes air loss, allowing the ball to keep its shape for a long time. If the bladder is also wrapped, it ensures perfect roundness and relieves the material which increases durability.

**Rubber bladder:** The rubber bladder offers significantly better air retention than the latex bladder. If the rubber bladder is also wrapped, it ensures perfect roundness of the ball. This helps to relieve the material and therefore contributes to a longer durability and higher playing quality.

## FUNCTION

On the sports field, in the gym or on long working days: the functional properties of our textiles help you look good in every situation. Pay attention to the corresponding icons KEEP DRY and STOP WATER on the JAKO products.

## TEXTILE CARE

Textile friendly washing and drying is an essential part of textile care. In order to enjoy your textiles for a long time, you should pay attention to the care symbols on the label in the clothing. With tips and tricks from clevercare.info you will learn sustainable textile care.

## CUSTOMIZATION

Club badge, sponsor logos or player numbers: with a customization you can make your equipment unmistakable. That is why numerous JAKO team sport articles offer large free space for individual customization. Talk to your local sports retailer.

**NOTE:** When finishing with screen printing, we recommend the use of a migration blocker to achieve the best possible result.

Microfine fibres transport moisture directly to the surface of the fabric. Thus, the material dries very quickly, protects against cooling and keeps you a comfortable body feeling during sports.

Waterproof functional materials and welded main seams also provide reliable protection against moisture. The high water vapour permeability guarantees a comfortable body climate.
